DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 7/07/04 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Drawings

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings filed on 08/10/01 are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

3. Claims 1-24 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Claim 1 recites, inter alia, calculating an average energy input to an actuator coupled to a haptic-feedback device over a predetermined period of time; and reducing a maximum allowable current level in the actuator if the average energy input to the actuator exceeds a predetermined warning energy level

Claim 12 recites, inter alia, an actuator coupled to the haptic-feedback device and configured to output a haptic-feedback; and a controller coupled to the actuator and configured to calculate an average energy input to the actuator over a predetermined period of time, the controller configured to reduce the maximum allowable current level in the actuator if a average energy input to the actuator exceeds a predetermined warning energy level.

Claim 20 recites, inter alia, reducing a maximum allowable current level in the actuator if the average energy input to the actuator exceeds a predetermined warning energy level; and increasing the maximum allowable current level in the actuator if the average energy input to the actuator is below the predetermined warning energy level, the maximum allowable current level is not above a current level allowed by the actuator.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include either of the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. J. Han whose telephone number is 571-272-2078. The examiner can normally be reached on Mon-Fri 5:30am-2:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Sherry can be reached on 571-272-2084. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
